
Auto Self Link to individual new uploaded image

Posted by adyjob - 2016/11/11 04:57

Possible to do this:

1. I just want Ari Image Slider to show latest (say 5) images that i uploaded.
2. And all the latest image will be automatically have link to the image itself.
3. I don't need to add any additional info once the image pop up. I just want the image clickable and enlarge during pop up.

How would be the ini setting?

Hello,

Set "Sort by" parameter to "Last modified date" value, "Sort direction" parameter to "Descending" value and "Number of images" to 5 value.

Regards,
ARI Soft
