
Menu Assignment

Posted by knosoft - 2017/02/01 12:49

Hello, thank you for the quick response.

I tried to integrate Ari Image Slider into an article. Only one working is displayed there.

At a module position it works.

My goal is:

A series of Thumbs to display and a larger picture about it. Is that possible?

The extension can show navigation bullets and show thumbnails when move mouse over the bullets.

Regards,

ARI Soft
