
Image Slider not show images

Posted by webycam - 2017/07/24 10:56

I have correctly installed ari image slider and it does not display the images.
In the hmtl code everything looks correct.

<http://ps2017.anmarca.com>

Thank yout.

Excuse my english is google translator.

Hello,

The problem occurs because several instances of jQuery library (at least 3 copy) are loaded on your site. It causes javascript conflicts and affects on page speed. You can use "jQuery Easy" Joomla! plugin to resolve this issue.

Regards,
ARI Soft
