New language problem
Posted by fmark86 - 2017/10/17 08:29
_____

I've been using this slider for months without any problem. New we decied to add a new language to our site (German). When I created the frontpage I saw that the slider didn't show up like on the English version. I tried to duplicate the original module and changing the language to German but this didn't help. What I noticed is that it shows in the admin panel that this module only loads on Selected Pages. Unfortunately there is no Menu Assignment option to change this...I attach a picture.

Any idea? :unsure: http://www.ari-soft.com/images/fbfiles/images/ari_slider-c6d088714273fee0d58c8a22324812d0.jpg

Hello,

Download and update the module to the latest version. If it doesn't help, could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft

Hello,

Thank you, updating to the latest version solved the issue and now it works great!

Mark
