
Caption position on slideshow

Posted by SheilaMary - 2017/11/15 12:16

Hello
Is it possible to position the captions on the mod_ariimageslider so that they are underneath the slideshow and not overlapping it at the bottom of the image?

Hello,
The extension doesn't require this ability out of box. It requires to modify CSS styles.

Regards,
ARI Soft

OK, thanks. Can you tell me how to do that? What code should I put in and where?

Could you provide a link to a page with the slider?

Regards,
ARI Soft

Here's one. <http://www.marvellous-provence.com/arles>

Many thanks for your help!

Sheila

It requires modification of jQuery plugin (javascript code). Sorry, but it is out of support.

In the module's "advanced parameters" there is a "CSS Styles" box where you can supposedly change things like removing the shadow around the slide. Is it possible to put in a command there? I tried the "{\$1d}_wrapper" one but it didn't seem to do anything.

Unfortunately it is not possible to do it only with custom CSS rules.
