
ARI Image Slider and PHP 8.0 not working

Posted by Captain A - 2021/12/22 13:16

Hello,

after changing to PHP 8 an error occurs:

'PHP message: PHP Fatal error: Array and string offset access syntax with curly braces is no longer supported in /var/www/vhosts/mw-stuttgart.de/httpdocs/joomla/modules/mod_ariimageslider/mod_ariimageslider/kernel/Web/JSON/JSON.php on line 156'

When the extension is activated, only a blank page is displayed.

What can I do? Is there an update?

Regards

=====
