
See full height of image

Posted by msuddes - 2022/04/08 19:09

Hello,

I have images that are 1200x800. The slider is set for these dimensions and responsive is on. The images are cut off.

Any way to fix this?

<https://michaellumos.com/index.php/new-look>

Thanks!

Michael

Hello,

Open "Advanced" tab on module settings page and populate "CSS Styles" parameter with the following CSS rule:

```
.nivo-slice {max-height:100% !important;}
```

Regards,
ARI Soft

Thank you for the reply.

I did this and it still cuts the image off.

I have version 2.2.5 could that be part of the problem?

Thanks!
Michael
