
Can't see images in IE - fine in Firefox & Chrome

Posted by Nigel - 2010/09/07 22:12

I can't see any of my images in IE8 but everything works fine in Firefox and Chrome. Any ideas?

Hello,

This isn't problem of the module. This problem with images. You can try to open the following link in FireFox and in IE and you can see that FireFox shows the image fine, but IE can't to do it. We suppose the images is saved not correctly. Try to open it in a graphic editor and re-save it. If you use Windows you can use Photoshop or Paint.NET.

Regards,
ARI Soft

Spot on! I did as suggested and everything now works a treat; fantastic! Thank you very much for your assistance and great module.

Nigel.
