
Image Slider covers menu

Posted by JoeCool - 2024/01/05 14:16

With Joomla 3 I did not have any problems. Now I use Joomla 5.

I have the image slider directly below the menu. In my menu I have sub menus. If a sub menu is opened the box of this sub menu is covered by the next image from the image slider. It even does not help to close and reopen the sub menu. The box of the sub menu stays covered by the image.

Any idea what I can change to solve that?

Hello,

Could you provide a link to a page where the problem occurs?

Regards,
ARI Soft

Open "Advanced" tab on module settings page and populate "CSS Styles" parameter with the following code:

```
BODY .container-header {z-index: 10000;}
```

Regards,
ARI Soft
