
Image Slider Fade-in first Image

Posted by joff - 2010/09/20 13:34

Hi there, I'm using Ari Image Slider with "Fade" as transition effect. Is there the possibility that already the first Image could fade in when starting the Slideshow?

Thanks

joff

Hello,

The module doesn't provide this ability, but we are going to add 'Loading' pane which will be shown until the slider is loading.

Regards,
ARI Soft
