
Change size of navigation arrows

Posted by n123 - 2010/10/29 17:50

Hello,
I'd like to change the size of the navigation arrows in the module. How can I do that?
Thank you in advance

Hello,

Image file with arrows is located by the following path:

/modules/mod_ariimageslider/mod_ariimageslider/js/themes/default/images/arrows.png

Regards,
ARI Soft

I resized this file, but then the arrows shows next to one another on the left of the slider. And that's not what I want. I wish the arrows to be on the left and right of the picture, as it is by default, and just be smaller...

Provide link to page where we can see slider with modified arrows because it requires to add some custom CSS rules.
