Hello,

Add the following code to "CSS Styles" parameter in module settings:

```
{ $id }_wrapper .nivoSlider
{
  -moz-box-shadow: none;
  -webkit-box-shadow: none;
  box-shadow: none;
}
```

Regards,
ARI Soft

thanks, but
you just put the piece of the code

```
.nivoSlider
{
  -moz-box-shadow: none;
  -webkit-box-shadow: none;
  box-shadow: none;
}
```

thanks man

Code which we provided affects only on specific module instance, your code will affect on all module instances. If you want to remove shadow from all module instances use your code otherwise use our code.
