## Title and Description Position

Thank you for such a great series of modules! I would like to move the Title and Description from the top left corner of the module box area to the top right corner (where the navigation arrows show when enabled) - Can you tell me how to do so?

Hello,

Add the following code to "CSS Styles" parameter in module settings:

```
DIV{$id}_wrapper DIV.ari-cloud-carousel-caption
{
  left: auto;
  right: 15px;
}
```

The module is excellent, thank you! You're the best! Tell me what to write in "CSS Styles", that the title and description have been under the module at the center. Thank you.  
ps Sorry for my Russian-English ...

With this code, only the title is centered, and the description in the lower left corner. Please help make the description in the center

This code works fine on our test server. Provide link to page where we can see the module on your site that we can investigate this problem.
