
carousel - to - lightbox - to - URL

Posted by edog5948 - 2011/01/15 01:14

Is it possible to configure the carousel like this?

- 1) Carousel images display and rotate
- 2) User selects one of the carousel images
- 3) Selected image pops up in lightbox
- 4) User selects image of the lightbox
- 5) User gets redirected to associated link URL

Hello,

Carousel can rotate images and display large image in lightbox or display associated link with carousel image in lightbox, but it doesn't provide ability to associate link with image in lightbox.

Regards,
ARI Soft
