ARI Cloud Carousel is not displayed on some pages

Posted by johny_nk - 2011/02/07 19:46
_____

Presumably the problem of showing only on pages with Virtuemart and Jcomments component. I have tried to disable plugins, modules. Looked in different browsers. Tried to change various settings in Joomla, enable and disable the cache. Also, do not show the title and description. When I use another template, the carousel is shown. And yet, when not showing the carousel, I noticed that the source code of the page is not connected mootols and caption.js. I'd like to use this template. Help please understand. I can give full access.

Hello,

We suppose this problem with site template. Probably it contains code which removes MooTools library and it causes javascript errors. If you send index.php file of site template or provide temporary to your Joomla! backend by email we can investigate this issue in more details.

Regards,
ARI Soft

very tricky template, the basic code is not in the index.php, they are in /templates/ecospa/layouts/original/layout.php IMHO
I sent a login and password on the email, if you need FTP pass, no problem...

:) you are a magician, thanks a lot! I'll be recommend for all your extensions! interesting how you did it? Tell me how to do to display the title and description? In the ini file, everything is written, but work only links. Perhaps the CSS problem? Help please!

Title is shown on your site. See screenshot please:

http://www.ari-soft.com/images/fbfiles/images/carousel-d4b388943dfe28d46c0222e82c56ce78.jpg

Descriptions are not defined in INI file.
