aricloud.ini - how to open link in new window?
Posted by tommarlo - 2011/02/11 11:13
_____

Hi,

I've installed V1.4.4 and I think it's a great tool. I am able to display circling thumbnails and to attach a link to them using the *.ini file.

I wonder if and how I can open a link listed in *.ini file in a new window (something like target="_blank").

My research in the forum and the web did not provide results. I only keep finding countless sites describing the tool and saying "Provides possibility to define link target: self window, parent window, new window or top window", but not a single page that describes, HOW to do this. That's a bit annoying.

Is there sample code which shows how to do it?

Thanks in advance

Thomas

_____

Hello,

Use "Link target" parameter in module settings that specifies "target" attribute for anchor elements:

Problem solved, thank you. I thought it must be done in the ini file...

Thank you for the quick response!!!

Thomas :)

_____

Hi,
i need all the circling thumbnails to open in Self Window so i have set that in the module parameters, but i need just one to open in a new window.

Is it possible to add something in the .ini just for the one to open in a new window??

thx

_____

Hello,

Add _target=_blank parameter to the link in INI file.

Regards,
ARI Soft

_____

How do you mean?

now i have:
myimage.jpg="http://www.mysite.com"

where must i add the _target=_blank on the link??
Have tried a few ways and none works...

thx

_____

Use the following code:

myimage.jpg="http://www.mysite.com/?_target=_blank"

Regards,
ARI Soft

_____

It works, thank you so much and also for the great extensions,
Bravo
