
load ari cloud carousel in article

Posted by mmam - 2011/02/18 14:20

i use jez load module plugin to load module in articles.

I tried {loadmodule "ID"} as i do, but it's not working properly.

I appreciate help on the subject.

Regards.

Rui.

Hello,

Could you explain, what doesn't work? Do you see plugin code or something another? Could you provide link to page where we can see this issue and temporary access to your Joomla! backend that we can investigate this issue?

Regards,
ARI Soft
