
SOLVED how NOT to open link in shadowbox

Posted by eropuitinbrabant - 2011/02/23 14:42

the .ini file defines what link to open and in the configuration i can set how to open it, but no matter what i do, it opens in a shadowbox. I visited some other sites using ari cloud carousel and they are all the same: links open in a shadowbox.

How to change that so I can open the links in the mainbody of the template?

Thanks for your help! <http://www.ari-soft.com/images/fbfiles/images/aricloud.jpg>

Hello,

Provide screenshot of module settings page and if it is possible link to page where we can see the problem.

Regards,
ARI Soft

ok, i came up with a solution myself. Looking through all the forums unleashed a brainwave. You have to diable all lightbox options in the configuration and then the link will not open in a shadowbox anymore, but in the same window where the cloud carousel is placed. Thta's what I wanted. :) <http://www.ari-soft.com/images/fbfiles/images/solution.jpg>

When "Lightbox integration" parameter is set to "No", the module show large images without any lightbox extension. If it doesn't work in this way, it can be a problem with 3rd party extension(s). Provide link to page where we can see this problem that we can investigate it.

Regards,
ARI Soft

sorry guys,
didn't mean to frustrate your quick responses by coming up with the solution 30 seconds ealier myself :laugh:
