
Sexy Lightbox with Carousel?

Posted by mistan - 2011/03/11 07:49

Have a question about Carousel with Lightbox? Do I have to set both to same location in order to integrate lightbox with Carousel? It leaves me with a empty block. Please take a look at the linked page.

Thank you.

Tony

Hello,

If you want to integrate "ARI Cloud Carousel" with "ARI Sexy Lightbox", configure "ARI Cloud Carousel" module, set "Lightbox integration" parameter to "ARI Sexy Lightbox", then install, enable and configure "System - ARI Sexy Lightbox" plugin. That's all.

Regards,
ARI Soft

That is what I did. Initially, only when I publish a lightbox module at the same position as Carousel, lightbox will work with Carousel. This morning, after I reinstall the Lightbox, it won't work at all. Is there a way to uninstall it clean? I can give you the admin access if you needed. Thanks.

Tony

The module and the plugins can be uninstall through "Extensions -> Install/Uninstall -> Modules" and "Extensions -> Install/Uninstall -> Plugins" page. We can help to configure the extensions if you provide temporary access to your Joomla! backend by email and describe what you want and where to show on frontend.

I think i may need your help to configure the setting for me. Here is the access info to the backend:
site: <http://portsina.com/Joomla1/administrator/>
user: mistan
pass:***

Following is what I want,

1. I want to intregrate the Lightbox with carousel in at "topblock" position in this page.
2. I want the same carousel with lightbox effects in the articles on the same page.
3. I want make two lightbox modules on this page working.

Thanks, let me know if you need more info.

Tony

P.S. Please let me know if I did anything wrong, so that I will learn my lesson and won't bother you again. Thank you!

Try now please. It was a bug with "Sexy Lightbox Anywhere" plugin when it worked in "Anywhere" mode, but we fixed it.

Thanks for the fix,

One more thing to confirm,
If I just want to apply lightbox to one item, I can just use rrel="sexylightbox" as in following. I do not lightbox module unless I have folder full of items, right?
YouTube video

Thanks,

Tony

Use the next code for "System - ARI Sexy Lightbox" plugin:

YouTube video

The following code is used for "System - ARI Sexy Lightbox Anywhere" plugin:

```
{arisexylightbox activeType="rcontent" width="800" height="450" url="http://www.youtube.com/watch?v=WyA1dzfKygw" link="YouTube video" title="Video"}{/arisexylightbox}
```

I have the carousel working and loading all images from my folder inside the article i wish. How do i get the lightbox to open when the image in the carousel is clicked?

Thanks in advance

Install, configure and enable "System - ARI Sexy Lightbox" plugin. After this set "Lightbox integration" parameter to "ARI Sexy Lightbox" in "ARI Cloud Carousel" module settings.

One note, images will be shown into the lightbox when thumbnails is used in the carousel ("Use thumbnails" parameter is set to "Yes" in module settings).

Regards,
ARI Soft
