I have a flash, try to use the code as following click to see a sample to play in lightbox. I can't seem to get it work. When I put the code from your demo page right underneath it, working fine. and the swf plays fine in a module on the right? Here is the link to the page. Please help. Thank you!

Tony

Update, This swf needs a library swf which resides in the same folder. Can this be the cause?

Hello,

Download and upgrade "ARI Sexy Lightbox" module and correct your code because it contains incorrect path to Flash object. It should look like:

click to see a sample
