
how to code a new carousel

Posted by kwickcut - 2011/04/01 00:45

I am running joomla 1.6 and i am trying to duplicate the carousel found on this page under example <http://www.demo2.ari-soft.com/joomla-carousel-module.html>...

my attempt is the top one <http://xuax.net/index.php/component/content/article/78-weapons/72-assault-rifles> is there a how to for this thanks

It seems you don't use "ARI Cloud Carousel" module.

PS: We have found javascript error on your page. It occurs due to you use "ARI Sexy Lightbox" and "ARI Sexy Lightbox Lite" extensions together. Disable "Content - ARI Sexy Lightbox Lite" plugin and use "System - ARI Sexy Lightbox" plugin that avoid the problem.

i have disables the ARI Sexy Lightbox Lite

amd i do have the ARI Cloud Carousel module installed and activated but i am not sure it the settings are correct. this is all new for me lol if there is a read me for this it would be great..

thanks for any help

Could you explain what problem you have with the extension? If you wish, you can provide temporary access to your Joomla! backend by email, specify path to images which you want to show in the carousel and we will be glad to help configure the module.

WOW that looks GREAT but how did u do it when i check the code under the article i only see

```
{loadposition riffles}
```

kwick

Re:how to code a new carousel

Posted by admin - 2011/04/01 05:47

This code loads all modules assigned to "riffles" module position. In your case it is "ARI Cloud Carousel" module with ID equals to "77".

oooo i think i see you just put the link to the pictures in the module area under Slides parameters..

now i can have more then one? would i just create a new like

example

```
hud/rifle  
hud/rifle2  
hud/rifle3
```

or do i need to do something like

```
hud/rifle;  
hud/rifle2;  
hud/rifle3;
```

thaNKS FOR THE HELP

Great THANK YOU VERY much...

one last question how can i link each picture to a description with a picture in it and have it open in lightbox

If you want to use "ARI Sexy Lightbox" lightbox then install, configure and enable "System - ARI Sexy Lightbox" plugin. Open "ARI Cloud Carousel" module settings page and set "Lightbox integration -> Lightbox integration" parameter to "ARI Sexy Lightbox". After this create INI file with description and links and place it to folder with images. Link to sample INI file you can find in "Description" field on module settings page:

<http://www.ari-soft.com/images/fbfiles/images/carousel-644339435f8d701739261aacad034f73.jpg>
