
Changing Module Title

Posted by DeeLowCee - 2011/04/15 14:58

Building my first website and this is such a wonderful addition. Would like to find out how to change the title of the module window on the page. The website will certainly give credit to AriSoft for providing the module, but it looks a bit odd in relation to the content subject of the actual page.

Thanks for the help.

Hello,

It is only default title of the module. You can change title of any Joomla! module in module settings page.

Regards,
ARI Soft

Well duh! :blush:

Sorry for the dumb question, looked everywhere except there.

Thanks!
