
Eliminate Links on pictures

Posted by hacka147 - 2011/04/26 10:43

Is it possible to eliminate the links that open the lightbox for maximizing the images? That would be nice!
Best regards.

Hello,

Do you use "Use thumbnails" parameter?

Download and upgrade "ARI Cloud Carousel" module. New version contains "Ignore original images" parameter. Set it to "Yes" and the module will not create links to original images for thumbnails.

How do I do this update? I tried to do it, but it doesn't work. I have my older version, that is one week old. And there is no possibility for this button. I'm sorry, I am a little confused. Hope you can help me.

Best regards

Download new version of the module here and install it over installed version of the extension. After this new parameter "Ignore original images" should appear in module settings.
