

Integrating Sexy Lightbox Plugin

Posted by Isiemon - 2011/04/26 20:38

The only plugin I see on your products page is Sexy lightbox lite. Is this one compatible with ARI cloud Carousel or is there another one I need.

Re: Integrating Sexy Lightbox Plugin

"ARI Cloud Carousel" can be integrated with ARI Sexy Lightbox, not with "ARI Sexy Lightbox Lite".

Regards,
ARI Soft

It appears that the "path to background image" only works when the plugin is installed, but Lightbox Lite, doesn't work with this

Re: Integrating Sexy Lightbox Plugin

That's fine, but does the plugin come with the Sexy Lightbox module package or where do I get it?

Re: Integrating Sexy Lightbox Plugin

"System - ARI Sexy Lightbox" is part of "ARI Sexy Lightbox" package. It is commercial product.

bought it, got it. There is 1 mod and 5 plugins that come with the package. Which ones do I need to install to make it work with carousel?

Re: Integrating Sexy Lightbox Plugin

Posted by Isiemon - 2011/04/26 23:18

I have installed the module, waiting to hear about which plugin to install

Re: Integrating Sexy Lightbox Plugin

Install "ARI Sexy Lightbox" module and install, configure and enable "System - ARI Sexy Lightbox" plugin. After this set "Lightbox integration" parameter to "ARI Sexy Lightbox" in cloud carousel module settings.

PS: If you use Joomla! 1.6, install "System - ARI Extensions" plugin from "ARI Sexy Lightbox" package.

Regards,
ARI Soft

I may be attempting to do something different, maybe I should explain what I am trying to accomplish. I want a background image behind the carousel. I have an image in a path "images/slides/background" Which I have set in the "path to background images" but nothing happens

If you want to add background image to cloud carousel, specify path to image, not to image folder in "Path to background image" parameter. If it doesn't work could you provide link to page where we can see the problem?

Regards,
ARI Soft
