Hi, I'm using cloud carousel module and it works fine: great job! But I want to affect if to a menu. How I can do it? Perhaps it's not possible directly and I need to have the cloud carousel plugin to use it in an article (and then my menu item is link is this article). And where I can have this cloud carousel plugin? Thanks in advance for your response. Regards	How to use ARI Cloud Carousel with a menu Posted by cloncle - 2011/05/06 13:04
