
CSS styling left and right buttons

Posted by keatby - 2011/05/06 13:36

Hello again.

I've noticed in the 'style.css' the lines for the left and right button images when idle. But I am unable to locate the lines for the button images when either in a state of 'hover' and/or 'click'. Could you direct me to the necessary file and code lines please?

Thanks in advance.

Kind regards.

Apologies! I just spotted it. Its a different way to what I'd do, but I understand whats been done, and how to customise.

Thanks again for your quick replies.
