## Joomla! Core Squeezebox

Posted by keatby - 2011/05/06 14:25

---

Hi

Can you direct me to a decent tutorial on how to implement and activate 'Joomla! Core Squeezebox', so 'ARI Cloud Carousel' can make use of it? I can't find any appropriate instructions through Google searching thus far. I've been through tutorials and code that don't work.

Thanks in advance.

Kind regards.

The lightbox comes with Joomla! by default. Set "Lightbox integration" parameter to "Core Joomla! lightbox" and set "Use thumbnails" parameter to "Yes" or assign links with images in carousel with help INI file. If integration doesn't work, it can be a problem with site template if it removes MooTools library.

Hi

I've put the latest 'mootools-core' in my 'js' folder, and added the following line to the 'index.php' in the , before the

Could you provide temporary access to your Joomla! backend and link to page where the module is used by email that we can investigate the problem?
