with rokbox, title is not showing
Posted by bjamminb - 2011/05/16 14:20

_____

Hi, I am using the carousel in joomla 1.6 with rokbox for the viewer, its all working fine but there is just one minor issue.

I am using the .ini file to generate a title and description for each image.. these show up on the carousel but only the description shows when I open the image in rokbox.

Can this be fixed?

_____

Hello,

It seems system RokBox plugin doesn't support ability to define title and description for images.

Regards,
ARI Soft

_____

i resolved this by using this text in the carousel description for the .ini file

title :: description

due to the semi-colons this is then picked up correctly in rokbox
