
Inserting Carousel in two Modelpositions

Posted by clubceronne - 2011/05/18 21:08

Hello,
if I'm copying the ari cloud carousel and having the new one in a different position, the first carousel doesn't show up any more. Both are published! I didn't change any parameters except the location of the pictures.

In the attached file you can see both carousels.
What you can see is, that there are two carousels with two different ids.

On the picture the first carousel should be on the left side of the ceronne logo.

Kind Regards

Ingo http://www.ari-soft.com/images/fbfiles/files/error_aricloudcarousel.txt <http://www.ari-soft.com/images/fbfiles/images/theCeronnepage.JPG>

Hello,

Provide link to page where we can see the problem or send page files of the page with the carousels by email. This process is described here.

Regards,
ARI Soft
