nav buttons aren\'t working

Posted by newbie - 2011/05/24 21:17

_____

Firstly thanks for a beautiful module. 3 questions: 1. I'm having trouble with the navigation buttons - they are visible but are not clickable. Any idea what might be the cause of this? 2. the title and description aren't the same formatting as in the demo (eg orange title)-- is it supposed to be or do I need to edit a stylesheet to duplicate that look? 3. How do I know which jquery version to select under Basic Options when I'm configuring the module?

_____

Hello,

1. Provide link to page where we can see the problem. It can be a problem with site template HTML layout or styles.

2. You can add custom styles with help "CSS Styles" parameter. For example add the next code to "CSS Styles" parameter:

{$id}_wrapper .ari-cloud-carousel-title
{
 color:#FF9900;
 font-size: 17px;
}
{$id}_wrapper .ari-cloud-carousel-alt
{
 color:#DDD;
 font-size: 14px;
 padding:5px 0 0;
}
{$id}_wrapper .ari-cloud-carousel-caption
{
 left: 20px;
 top: 15px;
}

3. You can set it to the latest available version.

Regards,
ARI Soft

thanks for the quick reply.

here's a test showing the nav buttons not working:

_____

Sorry, but what's the problem? You load the carousel into tab which has width less than width of the carousel and tab hide part of the carousel including navigation buttons.

Regards,

ARI Soft

:blush:

thank you, that fixed it.
