Manual Install?

Posted by coyote4444 - 2011/06/15 17:57

_____

My server doesn't have zlib installed and so I have to add plugins manually. Is there documentation somewhere to do this? thanks.

_____

Hello,

Joomla! can install extensions from directory, for this upload unpacked extension to a folder on your server and enter path to this folder in "Install from Directory -> Install Directory" field on Joomla! installation page.

Regards,
ARI Soft
