
Decrease top margin/space

Posted by ferry.mokiem - 2011/06/28 13:26

Dear users/support,

I have succesfully downloaded and installed the cloud carousel solution at joomla 1.5. This works perfect.

I have a small issue/question:

At my page (<http://www.joinevents.nl/index.php>) you see the carousel at the top displaying several images. There is a space between the header text (which is a image in this case) and the carousel images. Can I remove/decrease that space?

Hello,

Read this post please.

Regards,
ARI Soft
