## Nav buttons are working in the opposit direction

Posted by duchnowski - 2011/07/02 14:36

---

Right button ">" should not rotate carousel in the clockwise but it does

Left button "

Hello,

If you want to change direction of carousel navigation buttons, add the next CSS rules to "CSS Styles" parameter in module settings:

```
{ $id }_wrapper .ari-cloud-carousel-left
{
    float: right;
    background-image: url(modules/mod_aricloudcarousel/mod_aricloudcarousel/js/themes/default/images/rotate-right.png);
}
{ $id }_wrapper .ari-cloud-carousel-right
{
    float: right;
    background-image: url(modules/mod_aricloudcarousel/mod_aricloudcarousel/js/themes/default/images/rotate-left.png);
}
```

Hello,

firstly thanks for Your reply.  
Your tip seems to work but I have a small problem with this.  
After applying the tip I received my navigation buttons become invisible. Remain in the same place where they were, but became invisible. When I move the mouse indicators to place where the buttons should be I can click and carousel rotates in the proper direction now.  
I will be grateful for further hints.

Regards.

I should add that I changed the look of navigation buttons by saving new files.  
My new buttons graphic files I saved under the same name (rotate-right.png, rotate-left.png) in the same path (modules/mod\_aricloudcarousel/mod\_aricloudcarousel/js/themes/default/images/) and have the same pixel size as the original (40x80).  
I don't know whether it has any meaning but my new buttons were previously visible.

My page is now installed locally on my computer, move it to the server will take me some time...

I can attach screenshots if it helps...?

ok, I found a simple solution :-)

First I used the changed code from the first reply:

```
{ $id }_wrapper .ari-cloud-carousel-left
{
  float: right;
}
{ $id }_wrapper .ari-cloud-carousel-right
{
  float: right;
}
```

After that I saw that the buttons appeared on the carousel but they were swapped (left was at right position and right was at left)...

So... I just changed the names of graphic files:  
original name: "rotate-left.png" was changed into: "rotate-right.png"  
original name: "rotate-right.png" was changed into: "rotate-left.png"

Thanks for Your tip.

Regards.
