## JFolder::files: Path is not a folder:

Posted by TimoS - 2011/07/11 15:33

---

Hi folks,

first: it's a great extension and i love it! But I have a problem with it in one of my projects. I put it into an article with the smart plugin "Modules Anywhere" and I get always the error "JFolder::files: Path is not a folder:" on top of the page.

"What" is here the probleme? Modules Anywhere or ARI Cloud Carousel?

Link: <http://eurovisionlive.com/cms/index.php/history-eurovision-song-contest/eurovision-song-contest-2011> (Test-Page, full release on Nov 1st)

Thanks for your help!

Hello,

It seems this problem with integration with "Modules Anywhere" plugin. We can investigate the issue if you provide temporary access to your J! backend by email.

Regards,  
ARI Soft

Hi Ari Soft,

i found something in this forum and i tried it with only path to folder and not with a relativ path to every image...and it looks good, no "path is not a folder" problem. Do you have an explanation for this?

Kind Regards,  
Timo

---

now only "rotator/duesseldorf2010/" and before "rotator/duesseldorf2010/image1.jpg",  
"rotator/duesseldorf2010/image2.jpg" ....

---

Do you used it as parameter for "Module Anywhere" plugin tag or directly in module settings?

Regards,  
ARI Soft

---

directyl in cloud carousel.

settings in module anywhere:  
Settings JPG

settings: cloud carousel:  
Settings JPG

<http://eurovisionlive.com/cms/rotator/duesseldorf2010/image1.jpg> and  
<http://eurovisionlive.com/cms/rotator/duesseldorf2010/image2.jpg> files don't exist.

Regards,  
ARI Soft

---

it was only an example :-)

[eurovisionlive.com/cms/rotator/duesseldorf2010/belgium11.jpg](http://eurovisionlive.com/cms/rotator/duesseldorf2010/belgium11.jpg)  
[eurovisionlive.com/cms/rotator/duesseldorf2010/bosnia11.jpg](http://eurovisionlive.com/cms/rotator/duesseldorf2010/bosnia11.jpg)  
[eurovisionlive.com/cms/rotator/duesseldorf2010/estonia11.jpg](http://eurovisionlive.com/cms/rotator/duesseldorf2010/estonia11.jpg)

so..

"ARI Cloud Carousel" can accept path to folder(s) and to file(s) normally in "Image path" parameter. Just enter each path on new line. The problem could occur if incorrect code is used for "Modules Anywhere" plugin.

This error just happened to me. It was a really simple mistake of myself.

When I set up the module I entered the path to images directory and at the end of the line I pressed "Enter". So the cursor stood in the next, empty line. After saving and regarding my work I got this error!

Regards

Bernd
