## Problem with FireFox 5.0

Posted by Seraphin - 2011/07/27 11:24

---

Hello everybody,

iÒ've just installed the ari CloudCarusell 1.5.8  
on my page Fashion Nails Corner

In Internet Explorer the Images will be shown correctly.  
But in Firefox 5.0 theres only the background-Image shown.

Any Ideas whatÒ's going wrong?

IÒ've not edited any css or anything else.  
Just installed told the position, the menue where to show and the folder with images.

pleas help as soon as possible, the page should go online quite fast :unsure:  
my wife will kill me :woohoo:

edit:  
with firebug i found out that in the style.css on line 5 is visibility:hidden  
that canÒ't be normal or? when i erase that everything is good. but i donÒ't want to edit the css everytime i will creat a  
carousel :-)

=====

Hello,

This problem with HTML code around carousel. It is wrapped with tag. It is incorrect, remove this tag and the carousel  
will work fine.

Regards,  
ARI Soft
