_____

Use the next code:

{aricloudcarousel moduleId="65"}{/aricloudcarousel}

and check that the module is enabled.

The code doesn't work. I can't insert ARI carousel into an Article. But I inserted it in a different way and it works. Thanks a lot.
But if you have the answer for th insertion into an article, I'm still interested.

Regards

The code works fine on our side. We can investigate the issue if you provide temporary access to your J! backend by email and link to page where we can see the problem.

Anyway, I have found a solution and I can use your module.
Thanks
