Hi,

I'am a big a fan of your plug-in and think that it looks really great.

I have implemented it on my current homepage project and tried to insert a description for all my images. Unfortunately these descriptions are not shown.

I tried all of the solutions given here at the forum and no one worked on my homepage.

I hope that you can help me;-))

Here is the link to the homepage: http://83.169.3.40/homepage/index.php

Thank you very much for your help!

Hello,

Check that "Show description" and "Show title" parameters are set to "Yes". If it doesn't help could you provide temporary access to your J! backend by email so we could investigate the issue?

Regards,
ARI Soft
