
[SOLVED !]Reflection issues and lightbox nav...

Posted by GoToon - 2011/09/08 13:25

Hello

Firstly, let me thank you for this great module.

I have two problems :

Reflections of thumbnails are not aligned with the thumbnail

Besides, when the lightbox appears, I can't navigate with the different pictures (left and right arrows not present). I know that sexy light box, pretty light box, etc. can do this, but is there a way to do it with the core joomla Lightbox ?

I hope you did understand me, sorry for my bad english...

Thanks

Hello,

About reflection padding, it is conflict with site template styles. Add the next CSS rule to a site template CSS file to fix the problem:

```
div.block img.cloudcarousel
{
  margin: 0;
}
```

About navigation in core Joomla! lightbox, this lightbox doesn't support navigation.

Regards,
ARI Soft

Thank you !!

It works perfectly, but I saw in another topic that I can add a border to the thumbnail. Problem is that the border is not duplicated to the reflexion, so it is not aligned (again, lol...)

Sorry...

(Never mind for the navigation arrows)

Try to add the next CSS rule:

.ari-cloud-carousel canvas

```
{
margin-left: 3px;
}
```

One day, I hope I can understand what goes wrong as fast as you...

Thank you for your help and long life to ARI !!!

Hello !

Again, I have a problem with the cloud carousel.

Finally, I changed the border of the thumbnails: I think it's easier to do it on Photoshop.

The problem is that the carousel displays thumbnails but not those I've made. It displays reductions of the pictures.

I've created some thumbnails which I placed in images/stories/clients/Exemples_Doc/FR/Thumbs.

The reals pictures are in images/stories/clients/Exemples_Doc/FR.

How can I displays my own thumbnails for each picture ?

I found the solution for the problem below : I had to set "Thumbnail path" parameter to "Thumbs/{\$fileName}".

However, I still have another problem : how can I change the color of Title / Description and the position of the both text ?

Thanks !!

Use the next CSS rules:

DIV.ari-cloud-carousel-title

```
{
color: red;
font-size: 20px;
font-family: Tahoma;
}
```

}

DIV.ari-cloud-carousel-alt

```
{
  color: green;
  font-size: 22px;
  font-family: Arial;
}
```

Thanks !!

It works perfectly, I have added some "text-shadow" properties and it is now perfect !!

Thank you !!
