
problem adding second carousel

Posted by kwickcut - 2011/09/10 05:17

i have one carousel working but i can not get the second one up and going on a different page. i need help i am running joomla 1.5.15 not ready to upgrade to 7 just yet. i have added a new Module and set the directory for the images but i see the carousel on the wrong page. i added a new position (games) but then i can not select the order this is blank

Hello,

Do you load modules in module position or with help 3rd party extension into an article? Where we can see the problem? Could you provide temporary access to your J! backend by email so we could investigate the issue?
