
Background image

Posted by judemacd - 2011/09/23 16:16

I searched the forum to see how to get the background image to work and found mention of the wrong 'CSS Styles' parameters, what should be put in here? I entered the path to the background image, but didn't realize I needed to do anything else.

Hello,

Could you provide a link to a page where we can see the carousel and specify what value do you use for background image parameter?

Regards,
ARI Soft

Sorry, but provided page doesn't contain "ARI Cloud Carousel" module.

Set "Path to background image" parameter to images/bg1.jpg value.

I had that in from the start, thought I needed something else as it didn't work and was such a simple task. Attached screen shot, is there a limit to the size of the background? <http://www.ari-soft.com/images/fbfiles/images/ss.jpg>

Path to background incorrect on your screenshot, you entered images/bg1 instead of images/bg1.jpg value.
