
ARI Cloud Carousel + Core Joomla Lightbox Problem.

Posted by duchnowski - 2011/10/03 07:42

Hi,

I have small problem with Core Joomla Lightbox integration in Ari Cloud Carousel. My website. <http://www.damianifr.com>
In Firefox browser when I click on the image in the carousel the page is greyed out but does not appear enlarged picture.
Does not happen always, but often only in FF browser, in IE or Chrome it works well.
Sometimes the first few images to grow and then this happens as I described

I use Joomla 1.6.5 system. FF updated.

Hello,

This is not a "ARI Cloud Carousel" issue, this is a conflict with SqueezeBox (core Joomla! lightbox) and MooTools v. 1.3.
You can read about it and find the solution how to fix the problem here.

Regards,
ARI Soft
