
title - description - link don't works

Posted by mauvire - 2011/10/14 13:08

Hello,
using cloud carousel but there is no description visible.
Btn on "yes", and wrong target link by the images.
aricloudcarousel.ini is in the same map as the images (images/slide).
Makes differents changes but can't find alone the solution.
Title ok, description (dont need it), link ok...

Thanks for your help. Link to the site :

Hello,

Use the next INI file and check that it is located in folder with images:

1.jpg="nascholing"
2.jpg="eerstecommunie"
3.jpg="schoolpoort"
4.jpg="geloofenleven"
5.jpg="kuleuven.be/thomas"
6.jpg="godsdienschtig"
7.jpg="kindengelooft"
8.jpg="heiligen"
9.jpg="hellighart"
10.jpg="joodseomroep"
11.jpg="rorate"
12.jpg="bijbelspel"
13.jpg="mijnbijbelverhalen"
14.jpg="bijbelcitaat"
15.jpg="golev"
16.jpg="stichtingsamuel"
17.jpg="laatdebijbelspreken"
18.jpg="bijbelclub"

1.jpg=""

1.jpg="http://www.nascholing.be/index.aspx"
2.jpg="http://www.eerstecommunie.be/"
3.jpg="http://www.schoolpoort.be/"
4.jpg="http://www.geloofenleven.be/"
5.jpg="http://www.kuleuven.be/thomas/"
6.jpg="http://www.godsdienschtig.be/"
7.jpg="http://www.kindengelooft.nl/"
8.jpg="http://www.heiligen.net/"
9.jpg="http://www.hellighart.nl/"
10.jpg="http://www.joodseomroep.nl/"
11.jpg="http://www.rorate.com/"
12.jpg="http://www.bijbelspel.nl/"
13.jpg="http://mijnbijbelverhalen.nl/"
14.jpg="http://www.bijbelcitaat.be/"
15.jpg="http://www.golev.net/index.html"
16.jpg="http://www.stichtingsamuel.nl/"

17.jpg="http://www.laatdebijbelspreken.nl/"
18.jpg="http://www.bijbelclub.info/"

If it doesn't help, provide a link to a page where we can see the problem.

Thanks for the fast reply... make the changes, doesn't help, stil wrong link.
Look for the carousel on this page (bottom)
http://www.tochtgenoten.be/index.php?option=com_content&view=category&layout=blog&id=4&Itemid=4
for example for the first image I get this link : <http://www.tochtgenoten.be/images/slide/6.JPG>
the file is in the same map as my images: images/slide/aricloudcarousel.ini
images/slide/1.jpg

Images which are loaded into the carousel has .JPG extension, it is not the same as .jpg extension because it is case-sensitive. Correct INI file and it should help.

Hi,

i follow and up this post cause it's seems i have the same problem.

There is my aricloudcarousel.ini file:

```
picto_villargeau_blanc_2.png="Domaine de Villargeau Blanc"  
picto_villargeau_rose_2.png="Domaine de Villargeau Rose"  
picto_villargeau_rouge_2.png="Domaine de Villargeau Rouge"
```

```
picto_villargeau_blanc_2.png="Domaine de Villargeau Blanc"  
picto_villargeau_rose_2.png="Domaine de Villargeau Rose"  
picto_villargeau_rouge_2.png="Domaine de Villargeau Rouge"
```

picto_villargeau_blanc_2.png="http://www.google.fr/"
picto_villargeau_rose_2.png="http://www.google.fr/"
picto_villargeau_rouge_2.png="http://www.google.fr/"

And the website link: <http://www.domaine-villargeau.fr/nos-vins.html>

Could you explain me too the work of the custom link too, cause it's seems i can't use it too? But i think it's just a misunderstanding...

Thank you for you help.

Best regards,

Denis

Hello,

aricloudcarousel.ini file should be located in folder with images. This information can be found in "Description" field on module settings page.

Hello: I am using this tread as I will like to display my carousel as the one in the page of mauvire in http://www.tochtgenoten.be/index.php?option=com_content&view=category&layout=blog&id=4&Itemid=4 with the pause on mouse over.

I have placed ini file in images folder, and got titles working ok; but can't get links to images to work: http://www.dinamicaweb.co.cc/acw/index.php?option=com_content&view=article&id=32&Itemid=37

Already read all forum posts, but haven't found a solution:

01.jpg="Cocteles"
02.jpg="Plan Novios"
03.jpg="Eventos"
04.jpg="Fotos Eventos"
05.jpg="Familia"

06.jpg="Varela"
07.jpg="Historia"

07.jpg="http://www.dinamicaweb.co.cc/acw/index.php?option=com_content&view=article&id=41&Itemid=41"

Also, in module settings I am using lighthouse integration set to none (attach image of module settings); please advice.

Also, please indicate how to put either title or description above image like in this Website which has it working, but below: <http://www.vibroheaven.co.uk/>.

Thanks

Hello,

This problem with floating menu. It covers the most part of the page and disables links.

It started working after I turned off the PC; it must have been a cache issue.

Just please indicate how to put either title or description above image like in this Website which has it working below:
www.vibroheaven.co.uk/.

Thanks
