Bug with core Joomla Lightbox only when unlogged

Posted by lalit - 2011/10/14 13:57

_____

Hi,

I love this module I've discovered a few days ago but I have a strange bug in my homepage.

I'm using Joomla 1.6.6.
I have a Mac with Safari & Firefox.

With Safari :
The carrousel works well but when I click on a picture, the lightbox load the picture and display it 3/4 times vertically !
It's strange because this bug is visible only when i'm not logged in my site.

With Firefox :
It depends, sometime it's ok, sometime the screen is greyed & locked (I have to reload the page) and sometime it's the same bug with Safari.

Here is the address :
http://www.kravmaga-paris.fr/http://www.kravmaga-paris.fr/
The carrousel is at the bottom of the homepage.

Thank you for your help !

Regards,

Lalit

[SOLVED] Bug with core Joomla Lightbox

Posted by lalit - 2011/10/14 16:23

_____

Thanks.

I tried to install Mootools 1.3.2 and it was the same problem.

Finally I downloaded Mootools 1.4.1 on this site :
http://mootools.net/download

And now it works, thank you !
