
Cannot see images for carousel

Posted by newave - 2011/11/01 21:26

Hello,

I have installed the carousel module and was able to write the path for the background image. My problem is the actual carousel images. I have tried to write a path to the images and they will not show up. how do I write the path for my images correctly. Thank you.

My site page with the carousel is <http://www.newaveuniverse.com/nwuacp/2011-09-23-15-50-53>

Thank you!

Hello,

Where are images located and what value(s) do you enter in "Image path" parameter?

Hi,

If you dont mind, can you tell me how did you put the background image into your module exactly and where (code and filenames)...because i have problem whit this.

Thanks.
Manch

Hello,

For example if you want to use /images/bg.jpg images as background images, set "Path to background image" parameter in module settings to the next value:

images/bg.jpg

I used the same format as my background path. I used:

<http://newaveuniverse.com/nwuacp/images/onlinegameimagememoryblitz.png>

This does not show up. But my background path does showup:
<http://newaveuniverse.com/nwuacp/images/gamersbackground.png>

thank you!

If you mean "Image path" parameter, use the next value:

<images/onlinegameimagememoryblitz.png>

Hi there,

Module runs fine on other site but on my current creation it doesn't....Background image is fine, decription etc. also but the images for the carousel don't appear????

Any thoughts here?

Thanks :S

Hi,

I've installed the carousel and published it to my frontpage. I then uploaded my images to a folder "frontpageslides" in my Joomla's root directory and set the Image path param to: frontpageslides

But the carousel nevers gets past the loading icon.

Relevant page: <http://tinyprintworx.net>

The module is at the bottom of the page.

EDIT: It seems that the carousel was causing another slider on the frontpage to malfunction, so I've moved it to it's own page:

<http://tinyprintworx.net/index.php/design>

But that did not solve the problem at all.

Kind Regards,
Martiens

Hello,

This problem with menu on your site. It can't work when several jQuery instances are loaded. Set "Load jQuery" parameter to "No" in "ARI Cloud Carousel" module settings. It should help.

Regards,
ARI Soft
