Carousel background/frame

Posted by jgribble - 2011/11/30 00:03

_____

Just tried out another one of your great components. Question: in the CSS window is it possible to insert a code that will eliminate the border and the white background color? So that the module background is transparent against the wrapper color?

Also, I would love to see a demo of what the module can do when integrated with one of your lightboxes.

The module is very powerful out of the box, but I'd be interested in purchasing a lightbox if I can see an integration in action. Seems like it could be a good investment.

I am attaching a screenshot of the module as I set it up for testing this afternoon. The site as at javdevelop.com.

Regards,

_____

Hello,

1. The module doesn't add any background and borders to carousel images. See your original images please. They contain border and shadows so thumbnails contain them too.

2. Demo of integration "ARI Cloud Carousel" with "ARI Sexy Lightbox" is available here. Click on any image in carousel to open it into the lightbox.

Regards,
ARI Soft
