Problem with lightbox
Posted by dgsa82 - 2012/01/23 20:37

_____

Hi, im, using joomla 1.5.24 and the later version of Ari Cloud Carousel, but a problem with the core lightbox of joomla the popup does not work.

You can see the problem in http://profamilia.org.co/index.php?option=com_content&view=article&id=429:portafolio-de-productos-de-venta-formulada&catid=78&Itemid=259

Thanks in advance.

David S.

_____

Hello,

It seems this problem with "com_cu3er" component. It uses jQuery javascript library, but doesn't call jQuery.noConflict() method to resolve conflicts with MooTools javascript library which is used by Joomla! core lightbox.

Regards,
ARI Soft

_____

Hi, i talked with the people of Cu3er, and they say: "we inserted jQuery.noConflict() to our script but that didn't help, so we suppose that the problem isn't related to CU3ER after all."

Any help?

_____

Sorry, but we don't see that they call jQuery.noConflict() method immediately after loading jQuery library. jQuery.noConflict() is called after including MooTools library and Joomla! lightbox script, it is an incorrect.

_____

Hi, the cu3er people included jQuery.noConflict(); inside the query.js, you can see it at http://profamilia.org.co/components/com_cu3er/js/jquery.js but still don't work.

Any help?

_____

Now it works fine on our side. Try to clean browser's cache. We have checked it in FireFox v. 9.0.1.

Regards,
ARI Soft

_____

You are right. Now it works.

Thanks
