
Description only when image is in front of

Posted by dionysos - 2012/02/13 13:29

Hello,

i have set up my carousel and it's works really great (my client is pretty delighted)
-> <http://www.domaine-villargeau.fr/nos-vins.html>

I have just last problem: the description changes when the cursor is pointed on every carousel's thumbs. I want to display the description only when the thumb selected is front of. A little idea of what i want is show here: <http://www.emmi-aktifit.ch/sortiment/>

How can i modify the script to have the same?

Best regards,

Denis

Hello,

The module doesn't provide this ability. We can send original version of javascript file which is used by the extension so you can modify it for your needs.

too bad.
so, i will see how work the carousel i gave in example and try to do the same.

Maybe for the next upgrade? ;)

Best regards,
Denis

We will think about implementation this feature in a future release. You can also order custom development of this feature.
