
want to link from carousel picture to a homepage

Posted by Danhoooo - 2012/02/25 13:24

Hi guys,

Site: sopeo.at/start

i want to use a direct link to a homepage instead of displaying a thumbnail when opened the carousel image. the only thing i've found is to display an external link in this opened thumbnail, but i can't configure the size of this thumbnail so that all the content will show up correctly!

however ... is there any option to redirect/link this shown picture (after click on picture) in the carousel to an external homepage?

thx for your feedback
greetz

Hello,

It is possible to link carousel images with external links with help INI file. A link to a sample INI and instructions how to use it can be found in "Description" field on module settings page.

thx for the quick reply ... yeah its possible ... but the content of the external link will open on the same page - ne frame (like the picture thumbnails). I want to open a new tab with external homepage in the browser, not a frame with the content of the page? is this possible?

thx

Set "Link target" parameter to "New window".
