
Joomla 2.5

Posted by mcdmedia - 2012/03/08 09:48

I am looking for the Joomla 2.5 download for this component. In the Joomla extensions directory it shows it is compatible with Joomla 2.5 but I don't see a link to this anywhere. If you can point me to the right place where I can download the Joomla 2.5 version I would appreciate it.

Thanks a lot

Hello,

The extension can be downloaded here, use "Download ARI Cloud Carousel module for Joomla! 1.5+" link.
