
Special characters

Posted by aboy - 2012/03/24 17:40

First of all congratulations on the great work you are doing.

I just downloaded and installed this module and enter the names and descriptions I can not use special characters such as Ñ•, IÒ've tried with Ã± but doesnÒ't work either.

Any ideas?

Thanks in advance.

Hello,

Save INI file in UTF-8 encoding.

Regards,
ARI Soft
